

JONATHAN MORENO

Software Developer

PROFILE

Enthusiastic software developer who wants to utilize skills to solve challenges. Familiar with multiple programming languages for use on various projects. Looking to improve skillset through experience and future projects.

EXPERIENCE

Liberty Packing

2013-2016 – MACHINE OPERATOR

PROJECTS

For the Queen

ANDROID STUDIO/JAVA

A mobile game where you play as a bee in a side scrolling game. Collect flowers to increase your score, while avoid spiders. Made to raise awareness of the declining bee population.

Mystery Text 101

UNITY/C#

A text adventure game based off of a Dungeons and Dragons one shot I created for friends. Each scene can have up to three options for the player to choose from to progress the story.

Number Guesser

UNITY/C#

A simple number guessing game made to utilize unity's UI. Players will commit to a number while the program attempts to guess the number they have in mind.
